Environmental Considerations

Topics of Interest

We are actively studying and evaluating various potential impacts this transportation project may have on the environment. We welcome your input on these and any other environmental topics. The results of the environmental review process will be shared in the Draft Environmental Document, scheduled for circulation in 2023.

Air quality, greenhouse gas emissions, and vehicle miles traveled (VMT)

Visual (aesthetic) impacts

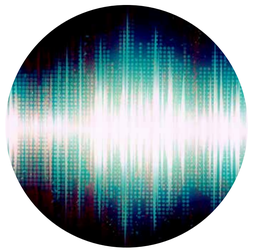
Land conservation and agricultural lands

Water quality and wetlands

Wildlife habitat and connectivity, including bird flight paths

Publicly-owned parks, recreational areas, refuges, and historic sites

Cultural resources



Noise and vibrations
